

## Argon instruction.txt

Warning: This upgradable firmware is only for the upgrade of MP3 player Argon 1051 after the version 2.5XX.

Do NOT! use for players of version 2.4xx, because this will crash the unit.

How to determine version:

In the menu of the MP3 player select the "About"; in the display : you will then see the software version and other data

or

Connect your MP3 player to your computer via the USB cabel, when the unit is detected you will in the MP3 player display

see a smal computer symbol and the software version

How to do upgrade:

Unpack the file ARGON1051-en.rar

Upgrade will be finished in four steps.

STEP 1: Installation.

- a. Run setup.exe;
- b. Once setup procedure is finished, click "finish" button to end installation.

STEP 2: Connect MP3 unit with computer.

STEP 3: Firmware upgrade

- a. in the start-up menu of the computer, choose "SigmaTel MSCN Audio Player", "Firmware download";
- b. When the window of "SigmaTel MSCN Firmware Download", click "Start" button to start downloading firmware;
- c. Once download procedure is finished, click "CLOSE" button to end download;

STEP 4: Disconnect MP3 unit with computer.

Notice. Power on MP3 unit, if the OSD is in Chinese state, please return it to English state via the SET menu on the MP3 player.
